LinkedIn — GitHub — LeetCode — GeeksforGeeks

Summary

Full-stack software engineer with hands-on experience building scalable **payment systems**, RESTful APIs, and production SaaS platforms using **Node.js** and **React.js**. Shipped end-to-end financial workflows integrating Stripe and CashFree across global markets. Strong CS fundamentals in **data structures, algorithms, and software design principles** — passionate about clean, maintainable code, system design, and high-growth engineering environments.

Experience

Bit Canny Technologies June 2025 – Present
Associate Software Engineer

- *Promoted from Junior Software Engineer (Jun 2025 – Dec 2025) to Associate Software Engineer (Jan 2026 – Present).*
- Engineered and maintained **production-grade SaaS marketplace platforms** across global markets (Ireland, Thailand) using **Node.js** and **React.js** — designing scalable backend services and **RESTful APIs** consumed by real end-users.
- Architected end-to-end **payment systems** integrating **Stripe and CashFree** — handling webhook processing, idempotent retries, and multi-environment payment configuration across **Dev/Staging/Prod**.
- Designed **RESTful API** layers backed by **MongoDB** and **MySQL**, with cloud storage on **Amazon S3** and third-party service integrations (Google Maps, Mapbox, SendGrid) — ensuring reliable data pipelines across production environments.
- Collaborated with **cross-functional** engineering teams — conducting **code reviews**, driving **code quality standards**, enforcing Git branching strategies, and contributing to **technical documentation** including design specs and architecture notes.

Projects

Community Manager Bot | *Python, FastAPI, Discord.py, ChromaDB, Gemini API* Sep 2026

- Built a **RAG-powered support assistant** for a game studio answering player FAQs from its own docs — **ChromaDB** vector store with local CPU embeddings, paragraph-aware chunking, and **Gemini**-generated answers grounded strictly in retrieved context.
- Exposed one shared retrieval core across a **Discord bot** and an embeddable website chat widget via a **FastAPI** REST API — adding per-IP rate limiting, CORS policy, admin re-index endpoints, and session memory; deployed on **Railway** as a single concurrent `asyncio` service.

Metta People | Lead Engineer | *React.js, Node.js, Sharetribe* Dec 2025 – Present

- Led end-to-end development of a **Thailand-based wellness marketplace** on Sharetribe — customising listing flows, search filters, and provider onboarding in **React.js**, from design spec to production deployment.
- Implemented scalable frontend architecture with custom components, improving listing discovery and user interaction workflows for service providers and end-users.

Activity Time | *Node.js, React.js, Sharetribe* | activity-time.com June 2025 – Dec 2025

- Built a **production marketplace platform** (activity-time.com) connecting Irish activity providers with parents — engineering booking, listing, and discovery systems on Node.js and Sharetribe with custom frontend components.
- Designed end-to-end booking and listing workflows with location-based discovery, tailored to the Irish market's UX and operational requirements.

Crowd Behaviour Detection | *Python, YOLOv7, YOLOv8*

- Designed a **real-time crowd violence detection system** in **Python** using **YOLOv7** and **YOLOv8** with transfer learning — benchmarked both on Hockey Fight and Real-time Violence datasets, weighing inference speed against accuracy to select the optimal model.

Skills

Languages: JavaScript, Python, Java, C/C++, HTML & CSS
Backend: Node.js, RESTful APIs, FastAPI
Frontend: React.js, Sharetribe
AI/ML: RAG, Vector Databases (ChromaDB), Embeddings, Gemini API, Prompt Engineering
Databases: MongoDB, MySQL **Cloud & DevOps:** AWS (Amazon S3), Railway, Git/GitHub, CI/CD
Payment Systems: Stripe, CashFree **APIs:** Google Maps, Mapbox, SendGrid
Concepts: Data Structures & Algorithms, OOP, System Design, Software Design Principles, Distributed Systems (fundamentals)

Education

Sister Nivedita University Oct 2021 – Jun 2025
Bachelor of Technology in Computer Science and Business Systems *Kolkata, West Bengal*

- CGPA: 8.57/10

St. John's High School Apr 2019 – Mar 2021
PCM (Higher Secondary) *Kolkata, West Bengal*

- Percentage: 91.75%
